

Candidate Instruments for a Universal Carbon Premium: The Commonwealth Cost of Carbon

Aidan T. Parkinson and Andreea M. Benu, 5 Colina Mews, London, N15 3HS

August 29, 2026

enquiries@aidantparkinson.com

Research highlights:

- A critique of using A Mathematical Theory of Saving to derive Social Costs of Carbon
- A novel interpretation of the State of Nature to derive a Commonwealth Cost of Carbon
- Commonwealth Cost of Carbon (CCC) is proposed as an Ecosystem Performance Indicator
- CCC may find best use as a method of price discovery for worldwide cooperation
